Overview of Bullying

Bullying is a form of aggressive behavior characterized by intent to harm, repeated occurrence (or high likelihood of repeated occurrence), and an imbalance of power between the perpetrator and the target.¹ It can take both direct and indirect forms and can occur physically, verbally, through social manipulation or exclusion (relational aggression), or through electronic devices (cyberbullying).¹⁻³ Bullying impacts individuals across gender, age, and race/ethnicity,^{4,5} although it tends to peak in middle school.⁴ Approximately one in five children and adolescents are involved in bullying.⁶ Bias-based bullying (bullying targeting an individual's actual or perceived membership in a social group or legally protected class, such as race, gender, religion, disability, or sexual orientation) impacts approximately 17% of youth and is associated with more negative outcomes than non-biased bullying.⁷⁻⁸

Adoption of empirically-based school-wide programs and a commitment to sustained professional development can increase the probability of reducing bullying in our schools and communities.^{3,9,11} Most successful programs are those that use multi-level interventions. Experts generally provide guidelines for schools to follow as opposed to prescribing a particular program.^{3,9} Although there are variations in these guidelines, some of the common aspects to include are listed in Table 1.

To learn more about bullying, bullying-related behaviors, and specific prevention efforts and programs, please refer to the Alberti Center fact sheets and to the publication entitled *Guide to School-Wide Bullying Prevention Programs*¹⁰ posted on the Alberti Center website (ed.buffalo.edu/alberti/resources). We also provide links to teaching tools for educators to use in their classrooms and schools on bullying prevention and related efforts (ed.buffalo.edu/alberti/resources/educators/tools).

Table 1: Common Guidelines for Bullying Prevention Efforts within Schools^{3, 9, 11}

1. Collect reliable, valid data about the nature and extent of the problem in the school setting.
2. Develop and implement an effective whole-school anti-bullying policy.
3. Emphasize personal, social, and conflict resolution skill development.
4. Increase awareness about bullying and how to prevent it by integrating this within the curriculum.
5. Increase supervision or restructure “hot spots” where bullying is most likely to occur.
6. Respond to incidents in a clear, fair, and appropriate manner within a continuum that recognizes the continuum of bullying behaviors.
7. Reach beyond the school to include parents.

About the Toolkit

Purpose

The *Bullying Prevention Toolkit for Elementary School Educators* is intended to provide educators with resources that support a positive learning environment and supplement comprehensive school-wide efforts to prevent bullying abuse and violence. It was created as a compendium of media that may assist educators in supplementing classroom instruction and to support individual and group counseling. Books and resources can be used to individualize instruction or as motivators prior and/or subsequent to lessons. This is by no means a static or comprehensive list but a resource that will be updated as additional publications and websites become available. The *Toolkit* includes books, videos, multi-media, websites, and podcasts targeted to specific audiences including educators, parents, and students of all academic levels. Three separate documents are available for educators who service elementary, middle, and secondary levels.

Selection of Resources

The selection of resources for the *Toolkit* was based upon free and easily found materials available in schools and public libraries. In order to include a book, website or video in any of the toolkits, the resource needed to (a) be geared toward the population of PreK-12 students; and (b) include content focused mainly on the subjects of bullying prevention, character education, social emotional learning, or social justice. Websites were reviewed with regard to appropriate materials that could be shared in schools. Those websites that were primarily commercial in nature were not included.

We would be happy to accept additional resources and recommendations, which may be directed to the Alberti Center at alberticenter@buffalo.edu.

Legislation and the Use of the Toolkit

In New York State, the *Dignity for All Students Act* (Dignity Act) took effect on July 1, 2012. The intent of this legislation is to “promote civility in public schools and to prevent and prohibit conduct which is inconsistent with a school’s education mission.”¹² The Dignity Act includes, but is not limited to, acts of discrimination and harassment based on a student’s actual or perceived race, color, weight, national origin, ethnic group, religion, religious practice, disability, sexual orientation, gender (defined to include gender identify or expression), or sex. These eleven categories are referred to as protected classes.

As required by this legislation, employee training programs must be provided on an annual basis “to promote a positive school environment that is free from discrimination and harassment; and to discourage and respond to incidents of discrimination and/or harassment on school property or at a school function.”¹³ The Dignity Act also dictates that educators must provide student instruction in the areas of civility, citizenship, and character education by documenting and tailoring lesson plans that address the eleven protected classes listed above. Resources found in the toolkit can be adapted for a variety of populations.

Disclaimer

The books, websites, videos and other resources listed and described in this publication are intended as additional tools which educators, parents, care providers, and community-based organizations may find helpful. These resources are designed to teach children and teenagers about bullying, its effects, and the ways that students can work individually and with their families, teachers, counselors, and administrators to prevent and address bullying in a positive and proactive fashion. These tools, when used in combination with a comprehensive curriculum; personal and/or group discussions; and outreach and counseling services, are intended to help potential, current, and past victims of bullying, intimidation, or violence; and to help aid in efforts to decrease bullying behaviors. Selecting and utilizing age and developmentally appropriate resources and content is especially important. Some of the content in the resources found in the toolkit may not be appropriate for every child.

Common Sense Media (commonsensemedia.org) provides guidelines and ratings for specific movies/TV, books, apps, and games for both parents and educators. Further, they provide suggestions for parents and educators on what kinds of content is appropriate for kids based on their age and developmental level. The first in a series intended to help adults empower bystanders of bullying. Each book will focus on a different reason children are bullied: a student who is poor, a student who has a learning disability, a girl who has ADHD, a student who is an English language learner, a student who has health conditions, etc. The central character, Beth, sees others with heart eyes and notices important things about others. She can detect what a person wishes others would know. That ability enables her to discover what a person has to contribute. Her compassion leads her to find creative, non-confrontational solutions. Children who read the book will be inspired to help others who are bullied—to follow Beth’s courageous and selfless example. The book contains a list of questions to ask children after reading the book, including possible responses (to help adults guide the responses). In addition, there are several questions to ask children privately or to prompt written responses.
