¹Years to degree is calculated as the number of days (reported in years) between the start date of the student's initial term to the date of the degree conferral.

²Time to degree calculations will not be reported until at least 3 years beyond the end of a cohort's start term to ensure skewed data are not reported.

³These figures have been updated to reflect a few more graduates since the previous report was published.

⁴These figures are preliminary, as there may be a few additional future graduates that increase the cohort average by less than .25 years.
