

ADVANCED CERTIFICATE IN REHABILITATION COUNSELING

ADVANCED CERTIFICATE IN REHABILITATION COUNSELING

Our rehabilitation counseling advanced certificate program gives you the background education and information needed to effectively work with clients with a disability who want to overcome or manage personal, social, and professional or employment issues that prevent them from achieving their goals. This program provides you with the educational requirements to be eligible for the Certified Rehabilitation Counselor (CRC) credential exam while complying with all Commission on Rehabilitation Counselor Certification (CRCC) requirements.

This certificate will:

- > Offer program courses that are approved by the Commission on Rehabilitation Counselor Certification (CRCC).
- > Prepare you for a successful career in the highest paid counseling profession, including better overall benefits (American Counseling Association).
- > Provide you with training to enter a field with a projected employment growth of 20% through 2022 (U.S. Department of Labor). This is due to an increasing elderly population and the continued rehabilitation needs of other groups, such as veterans and people with disabilities.

Who should enroll in this advanced certificate program?

This certificate is best suited for those whose calling is to help people overcome personal challenges and who hold a master's degree in counseling or a related field (as determined by the CRCC on their website) and who want to help veterans or people with disabilities return to work or live independently.

This advanced certificate is offered **ONLINE**.
